ANXIETY

Why wait for your child to fall behind or drop out of school.

We will evaluate your child's cognitive and emotional strengths and weaknesses.

We provide a broad range of assessments which evaluate memory, language, attention, development, visuospatial functions, self-esteem and factors contributing to stress and bullying.

Our assessments will provide practical advice and endeavour to answer all your questions.

**Neuropsychologists,
occupational therapists,
psychologists and
psychomotor therapists.**

Our staff are ready to help.

Develop to success !

Our professional multi-disciplined team's goal is to provide the best and quickest response to supporting self-reliance for your child.

A quick and early intervention supports your child in positive development for school, family and social environments.

By providing a strategy and its ongoing development, we will give your child the tools to overcome difficulties with the goal of becoming self-reliant.
